

Forget the net, leave the skimming to us. Introducing the TriVac 700™ pressure cleaner—the only cleaner with Top and Bottom modes capable of skimming debris from the surface of the water in addition to vacuuming the pool floor, walls and coves. Versatile and one-of-a-kind, TriVac 700 features patented AquaDrive® Technology; powerful jets that propel the cleaners easily and efficiently around the pool. No matter the cleaning mode, AquaDrive helps TriVac get the job done faster and with less wear-and-tear.

Applications

- In-ground residential pools – gunite, vinyl, fiberglass, pebble and tile
- Skims debris from the top surface of the water
- Cleans the pool floor, walls and coves

Features

Unique skimming feature

- The only cleaner that captures debris on the top surface of the pool.

Easy access dial for mode selection

- Simple turn of dial allows choice between Skimming Top Mode or Bottom/Wall Mode.

Patented AquaDrive® technology

- Powerful jets propel cleaners easily and efficiently around the pool.
- Unique short back-up sequence helps reduce cleaning time.
- Low-friction wheels eliminate wear-and-tear on pool surfaces.
- Three high-pressure venturi jets and a wide vacuum inlet easily pick up larger debris.

Powerful sweep hose

- Improves coverage by stirring up debris in hard-to-reach areas.

Easy management of dirt and debris

- Patented extra-large debris bag with unique float carries more and requires less maintenance.

Hayward Booster Pump (Model 6060) is exceptionally quiet and uses up to 40% less electricity than other booster pumps (required for operation and sold separately).

For replacement parts see pages 239–243.

Hayward Booster Pump (Model 6060) is exceptionally quiet and uses up to 40% less electricity than other booster pumps (required for operation and sold separately).

When skimming is not required, the TriVac™ 500 provides the perfect solution for superior coverage of the pool floor, walls and coves. Featuring patented AquaDrive® technology, its powerful jets propel the cleaner gently around the entire interior of the pool as its wide vacuum inlet scoops up more dirt and debris. A powerful sweep hose helps the cleaner cover corners and crevices, while a unique short back-up sequence helps it work faster. With an extra-large debris bag and unique float, TriVac 500 can carry that much more.

Applications

- In-ground residential pools – gunite, vinyl, fiberglass, pebble and tile
- Cleans the pool floor, walls and coves

Features

Patented AquaDrive technology

- Powerful jets propel cleaners easily and efficiently around the pool.
- Unique short back-up sequence helps reduce cleaning time.
- Low-friction wheels eliminate wear-and-tear on pool surfaces.
- Three high-pressure venturi jets and a wide vacuum inlet easily pick up larger debris.

Powerful sweep hose

- Improves coverage by stirring up debris in hard-to-reach areas.

Easy management of dirt and debris

- Patented extra-large debris bag with unique float carries more and requires less maintenance.

A superior, faster clean.

Unique back-up sequence.

AquaVac 500 robotic pool cleaner comes equipped with a microprocessor-based program that determines the most efficient cleaning path possible where pool owners can simply select the cleaning frequency that best matches their pool debris load. Working independently of the pool filtration system, this robotic pool cleaner technology is the most energy efficient cleaning solution.

Applications

- In-ground residential pools – gunite, vinyl, fiberglass, pebble and tile
- Cleans pool floor, walls, coves and waterline

Features

Dual traction system

- With two scrubbing brushes and four wheels it navigates virtually any obstacles, pool surfaces and easily climbs walls
- Brushes and loosens dirt, debris and algae for easy pickup

Two cleaning programs

- Features Dual-Mode technology: fast 90 minute pool floor only or deep 3-hours pool floor, walls, coves and waterline cleaning

Easy top-access to debris

- Top-access debris container and removable cartridge elements makes cleanup easy

Integrated recurring timer

- Allows you to choose cleaning frequencies from a one-time clean to every 24, 48 or 72 hours

Sensors

- Out-of-water sensor protects the motor by preventing cleaners from running out of the water
- Beach-entry sensor reverses direction when pool cleaner starts climbing out of the water

Swivel

- 60 foot cord swivel to eliminate cord tangling

Easy to use

- Requires no hoses or hookups nor additional pumps, just let it clean
- Runs separately from the pool's filtration system so there is less backwashing

New for 2016, our TigerShark® series of robotic cleaners feature a new and contemporary design. Equipped with intelligent microprocessor-based technology, the TigerShark family is recognized for its superior performance in reliability and efficiency. TigerShark makes sure virtually every area of your pool gets that much cleaner, and fast! The TigerShark® QC automatic robotic cleaner is no exception with a fast 90 minute Quick Clean cycle.

Application

- In-ground residential pools – gunitite, vinyl, fiberglass, pebble and tile
- Cleans pool floor, walls, coves and waterline

Features

Efficient cleaning programs

- All TigerShark models come with a standard 3-hour complete cleaning cycle for full floor, walls, coves and waterline.
- Patented Quick Clean technology (TigerShark QC model) provides a fast 90 minute cycle.

Powerful vacuum strength

- On-board pump for intense vacuum power to suck up dirt and debris.
- Built with an efficient 24-volt motor designed to use less energy and lower cost.

Unique cartridge filter system

- Makes emptying easy, just open the cleaner, remove the cartridge and rinse with a hose.

Easy to use

- No extra hoses, hookups or pumps required.
- Runs separately from the pool's filtration system reducing the frequency of filter backwash cycles.

Optional Premium Caddy Cart – RC99385 (sold separately)

Spring Clean-up Filter Elements for heavier debris – RCX70103PAK2 (sold separately)

***Replacement parts for older TigerShark, TigerShark QC and TigerShark Plus whole good cleaner models see pages 250–251. Replacement parts for new whole good cleaner models are not included in this Buyer's Guide 2016 edition but are available for viewing online at Hayward.com.**

SharkVac & SharkVac XL™ by HAYWARD®

ROBOTIC POOL CLEANERS

New for 2016, our SharkVac series of robotic cleaners feature a new and contemporary design. Both SharkVac and SharkVac XL™ by Hayward® are built with the highest-quality components and proven technology that create reliable, consistent results while maximizing energy efficiency. Whether you clean your pool floor and coves with SharkVac or cover the floor, walls, coves and waterline with SharkVac XL, the cleaners' robust, low-profile design and top-access filters give them an added bite.

Application

- In-ground residential pools – gunite, vinyl, fiberglass, pebble and tile
- Cleans pool floor and coves (SharkVac); cleans pool floor, walls, coves and waterline (SharkVac XL)

Features

Efficient cleaning program

- Features a smart steering technology that provides an efficient cleaning pattern for complete pool coverage.

Easy top-access to debris removal

- Top-access filter allows quick debris removal and easy cleanup.
- 2 fine porosity filter elements – just remove and rinse with garden hose.

Easy to use

- Requires no hoses or hookups nor additional pumps – just let it clean.
- Runs separately from the pool's filtration system, reducing the frequency of filter backwash cycles saving both time and money.

Sensors (SharkVac XL only)

- Out-of-water sensor protects the motor by preventing cleaners from running out of the water.
- Beach-entry sensor reverses direction when pool cleaner starts climbing out of the water.

Caddy Cart – RC97385D included with Model RC9742CUBY and RC9742WCCUBY (sold separately with Model RC9740CUB and RC9740WCCUB)

Navigator® V-Flex™ suction cleaner features breakthrough new internal turbine, body and a-frame design, delivering more power, reliability and performance than ever. Equipped with patented V-Flex™ variable vane technology, it allows for larger debris pickup and maximizes suction power at lower flow, making it ideal for use with variable speed pumps. Patented SmartDrive® programmed steering determines the most efficient cleaning path affording unparalleled pool coverage.

Applications

- In-ground residential pools – gunite, vinyl, fiberglass, tile and pebble
- Cleans pool floor, walls and coves

Features

Patented V-Flex technology

- Features self-adjusting variable vanes for easy handling of larger debris
- Energy-efficient design maximizes suction power at lower flow—ideal for use with variable-speed pumps

New body, A-frame and turbine assembly

- Enhances reliability and performance with less parts to service and maintain

Programmed cleaning

- Exclusive SmartDrive® steering system offers unparalleled pool coverage.

Efficient suction path

- Wide vacuum inlet, unique wing and skirt designed for constant suction power and to pickup more debris faster

Easy to use and install

- Connects in less than 10 minutes to skimmer or suction port, no tools required
- Powered by existing filtration system, does not require booster pump

What is SmartDrive programmed steering?

Hayward's exclusive technology drives the

Navigator V-Flex in an alternating series of right and left-hand turns to systematically clean pool surfaces and ensure the best coverage and most efficient cleaning path. It cleans faster and better than random-style cleaners and reduces the possibility of missed or over-visited zones in the pool.

Navigator® Pro's exclusive SmartDrive® programmed steering moves the cleaner silently in a predetermined series of turns for more thorough cleaning of pool floor, walls and coves. This automatic suction pool cleaner is powered by the existing filtration system where all debris are captured. In addition, pool owners don't have the expense of an energy-consuming booster pump. Getting that sparkling clean pool is easy and effortless with the Navigator Pro automatic suction pool cleaner.

Applications

- In-ground residential pools – gunite, vinyl, fiberglass, pebble and tile
- Cleans pool floor, walls and coves

Features

Engineered for performance

- Unmatched proven and reliable suction cleaner performance
- Turbine-driven system for smooth, silent operation

Programmed cleaning

- Exclusive SmartDrive® steering system offers complete pool coverage.

Efficient suction path

- Wide vacuum inlet, unique wing and skirt designed for constant suction power and to pickup more debris faster

Easy to install and use

AquaNaut® 200 & 400 automatic suction pool cleaners are designed with unique patented technologies to deliver a thorough and reliable clean for pools of different shapes, sizes, flow rates and debris types. Available in two or four wheel drive models, AquaNaut features patented self-adjusting variable vanes known as V-Flex™ technology. Because the variable vanes automatically adjust to allow for large debris to pass through the cleaner, V-Flex technology delivers maximum power even at lower flow and provides the peace of mind of clog-free cleaning.

Applications

- In-ground residential pools – concrete, gunite, vinyl, fiberglass, tile and pebble
- AquaNaut 200 is for pools up to 16' x 32'; AquaNaut 400 is for larger pools up to 20' x 40' or pools with deep ends.
- Cleans pool floor, walls and coves

Features

Handles large debris without clogging

- Patented V-Flex variable vane technology eliminates clogs and maximizes power at lower flow
- Perfect for use with variable-speed pool pumps

Expertly navigates any surface

- Patented robust tire treads provide superior climbing power and obstacle maneuverability

Maintains constant suction

- Patented adjustable roller skirt maintains optimal suction on uneven surfaces.

End-to-end cleaning

- Multiple pre-programmed steering sequences ensure complete pool coverage

Available in 4-wheel drive

- With its 4-wheels, AquaNaut 400 maintains power and balance in larger pools or pools with deep ends

Optimal suction at virtually any flow

- Three easily interchangeable throats improve debris passage and suction performance, making it ideal for use variable-speed pool pumps

DV5000, AquaRay®

AUTOMATIC DISC SUCTION CLEANERS

DV5000

Backed by the most trusted name in swimming pool equipment, the DV5000 scoops up dirt and debris in a single pass. The DV5000 has only one moving part that automatically propels it through the water picking up dirt, debris, twigs and pebbles. Its quiet and efficient operation ensures full coverage of the pool's floor and walls.

Applications

- In-ground residential pools
- Cleans pool floor, walls and coves

Features

- Diaphragm technology – quiet operation
- Cleans the pool's floor and walls
- One moving part
- Pulls in dirt from 3 intake ports
- Swivel foot pad for easy navigation out of tight corners
- Automatic regulator valve sets the ideal suction for peak performance

AquaRay

AquaRay is an affordable, automatic suction cleaner with only one moving part for added reliability. Backed by the most trusted name in swimming pool equipment, AquaRay scoops up dirt and debris from three separate intake ports. Its gliding motion makes it an ideal choice for cleaning above-ground pools and is easily installed, without tools, in less than 10 minutes.

Applications

- Above-ground pools
- Cleans pool floor and coves

Features

- Flapper technology – only one moving part
- Installs in less than 10 minutes without tools
- Works with your existing filtration system; no extra energy-consuming booster pump is required
- Pulls in dirt from three intake ports
- Automatic regulator valve sets the ideal suction

- On-ground pools

Features

- Patented SmartDrive programmed steering system ensures the entire bottom of the pool is cleaned quickly and completely
- Installs in less than 10 minutes, without tools
- Unique turbine/gearing system provides constant balanced water flow assuring quiet operation and gentle movement across the pool bottom
- Improves water circulation by pulling water from the pool bottom as it moves
- Advanced, contoured head design allows the steering pattern to be completed in minimal time
- Deluxe bumper ring minimizes friction for easy movement away from walls and resumption of the programmed steering pattern
- Attractive 4-color unitized cartons create a professional presentation that will stimulate sales

Tips on Hose Requirements

A simple rule of thumb is to measure from the skimmer (or dedicated suction line) to the farthest point in the pool then add three (3) extra hose lengths.
